

**Building Evacuation**

**PURPOSE:**

To ensure the safety of all personnel during deteriorating conditions.

**SCOPE:**

When operating at an emergency scene, it may suddenly become too dangerous to continue operating in a particular structure. To prevent injury to firefighters or any other emergency workers in this location an emergency evacuation signal shall be sounded. This signal shall be ordered by the Incident Commander or the Safety Officer at the scene. This signal shall consist of a series of three blasts on the apparatus air horns or siren, repeated every thirty seconds for two minutes.
